

**Tiny Gold Barberry**  
*Berberis thunbergii 'Tiny Gold'*

Height: 24 inches

Spread: 24 inches

Sunlight:

Hardiness Zone: 4a

**Description:**

This variety brings bright color into the landscape; striking yellow foliage that becomes more chartreuse at maturity; very rust resistant, slow growing and low maintenance

**Ornamental Features**

Tiny Gold Barberry has attractive chartreuse deciduous foliage which emerges yellow in spring on a plant with a round habit of growth. The oval leaves are highly ornamental and turn an outstanding yellow in the fall. It features tiny clusters of buttery yellow flowers hanging below the branches in mid spring.

**Landscape Attributes**

Tiny Gold Barberry is a dense multi-stemmed deciduous shrub with a more or less rounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance shrub, and can be pruned at anytime. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Tiny Gold Barberry is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

**Planting & Growing**

Tiny Gold Barberry will grow to be about 24 inches tall at maturity, with a spread of 24 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

## PLANT FINDER

This shrub does best in full sun to partial shade. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
